Row & TRX (50 Min) (additional charge applies)

WaterRower machines are powered by water and a unique flywheel technology that allows you to create your own resistance and give an experience more authentic to rowing on the water. Each machine features a monitor that provides instant feedback on pace, distance, and more allowing individuals to gauge improvement in each class and over time.

With the addition of the TRX suspension trainers, Barres, and other small equipment the class is taught with intervals on and off the Rowers. This small group class is limited to 6 people and allows for more personal attention in each class.
